Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

1. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Killian, U.S. Pat. No. 6,438,592. Killian teaches a method for measuring quality of service over a network, the method comprising (abstract):

transmitting from a server (server which receives URL requests) to a client a mobile program (performance monitoring instructions) and a plurality of first identifiers (the server identifies the target hosts when it receives URL requests) representing a plurality of first target hosts accessible to the client over the network, the mobile code being executable in a client application and capable of measuring one or more quality of service parameters of communications between the client and each of the first target hosts (abstract, col. 3, line 20-45 and col. 4, line 58-62, the performance monitoring instructions cause the client computer to send to the server performance messages indicating the length of time required on the client for performing an act associated with the transmitted objects); and

receiving at the server from the mobile program data representing a plurality of quality of service parameters measured by the mobile program from communications between the client and the first target hosts (abstract and col. 3, line 20-45; the server receives performance information and problems from the client).

Conclusion

1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Pat. No. 6,411,998 to Bryant et al. (A method of determining Internet delay associated with requests from a client)

U.S. Pat. No. 6,502,131 to Valid et al. (A method for monitoring or profiling quality of service within information sources in a network of computers)

U.S. Pat. No. 6,137,782 to Sharon et al. (Analyzing traffic flow between agents)

U.S. Pat. No. 6,460,070 to Turek et al. (Mobile agents for fault diagnosis and correction in a network)

U.S. Pat. No. 6,263,361 to Hoyer et al. (Method for calculating capacity measurements for a website)

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sahera Halim whose telephone number is (571) 272-4003. The examiner can normally be reached on M-F from 8:30-5:00.
